## Nasscom delegation for China ■ Mobera and IDS of Chandigarh to form part of team

PBD BUREAU

CHANDIGARH, SEPT 14

MOBERA Systems and IDS Infotech are the two companies from the northern region who will be a part of the Nasscom's special delegation to China from September 17 to 22.

The visit was being organised as a part of Nasscom's initiative to increase partnership opportunities between IT companies in the two countries.

Puneet Vatsayan, Director, Mobera System, says that "our objective is to meet up with US and European product companies having China development centre, who could be made interested for India development centres, especially in the areas of embedded technologies, telecom and wireless and mobile gaming etc".

Mobera is also looking forward to meeting up with Chinese software

service companies for possible joint venture initiative, he said.

The visit shall help us understand the ground realities and how both

**“ The visit will help us understand the ground realities and how both the countries could join hands to expand our own offerings and geographical reach ”**

the countries could join hands to expand our own offerings and geographical reach, says Puneet.

Partap Aggarwal, Managing Director, IDS Infotech, feels that China was an interesting country that has made rapid investment and progress in IT services. China is viewed as an alternate to the IT industry and it inspires awe both as

a competitor and a collaborator. "We run into the China question all the time when we are talking to prospects and customers", he commented.

Other companies include, Aspire Systems (India) Private Limited Chennai; Compulink Systems Limited Pune; Eastern Software Systems Private Limited New Delhi; Hurix Systems Private Limited Mumbai; Induslogic India Private Limited Noida; Network Programs (India) Limited Noida; Newgen Software Technologies Limited New Delhi; FicoPeta Simputers Private Limited Bangalore and Symphony Services Corp (I) Private Limited, Bangalore.

The delegation visit will coincide with the CeBIT Asia, happening in Shanghai from September 17 to 20, a leading event for all aspects of information technology and telecommunication.
